TrueClr M+

Active External
Urine Collection Apparatus

TrueClr: Preserve Dignity & Save Time

AN ALTERNATIVE TO USING A TRADITIONAL INTERNAL CATHETER

TruClr is the world first completely external system designed to comfortably evacuate the bladder eliminating CAUTIs.

- Non-invasive, non-adhesive and easy to apply
- Eliminates skin irritation and inflammation
- Latex-free and hypoallergenic
- Easy-to-use, portable & reusable
- Made in the USA

WHAT YOU NEED

1. A TrueClr Urine Collection Apparatus (UCA)
2. An aspirator pump. Pump must meet specifications:
Vacuum Range 50-150 mm Hg +/- 10%*
Air Flow @ Pump Inlet: 27 LPM (free flow)
3. Reusable Collection Container Capacity 1200 ml (cc)

Figure 1

Roll back the end of UCA

Figure 2

Apply the UCA and unroll onto penis

Figure 3

Urine flows into canister

Figure 4

Break suction and unroll UCA to remove

TrueClr M+

A revolutionary external catheter system designed to actively empty the bladder while eliminating the risk of Catheter Associated Urinary Tract Infectious (CAUTIS)

>13,000

deaths per year from internal catheters

80%

of all hospital Urinary Tract Infections (UTIs) result from internal catheters

\$6.2B

spent in healthcare due to CAUTIs in the USA

CMS

reimbursable with code A6591*
